

Indoor Air Quality Policy

To ensure that the school building has adequate indoor air quality, the Board of Trustees directs the Head of School to address methods of minimizing or eliminating emissions from cars, delivery vehicles, buses, and other motorized vehicles. The Board encourages the Head of School to utilize methods and recommendations established by various State agencies.

In addition to addressing methods eliminating emissions, the Head of School is directed to annually investigate air quality in the school building using a checklist provided by the New Hampshire Department of Education.

In support of this policy, the Head of School is authorized to establish regulations and/or administrative rules necessary to implement anti-idling and clear air measures aimed at improving indoor air quality.
